

Editorial Note

Greetings! our best wishes to all the readers and well-wishers of the **Journal of Development Economics and Management Research Studies (JDMS)**. The Government of India 2022 budget gives priorities with 36 percent increase in allocation to capital expenditure which is 2.9 percent of GDP for FY 2022-23. This may crowd in private investment. The RBI's monetary policy announced in February 2022 is without altering the interest rate by considering the economy and to boost the fast recovery phase of our nation from Covid-19 damages. The recent UN Conference on Trade and Development (UNCTAD) report projected India's growth at 4.6 percent for 2022 due to the war in Ukraine. The projected rate is better when compared to the global economic growth projection of 2.6 percent from 3.6 percent for 2022. The war has increased the oil prices and it disturbed the Indian economy drastically with regard to its impact on mounting commodity prices, demand and supply imbalances, inflation pressures, volatile financial markets, geopolitical tensions, export situation, GST collection, business environment etc.
